Cerebellar Stroke in 2014

Market research commenced 2017

Company formed 2018

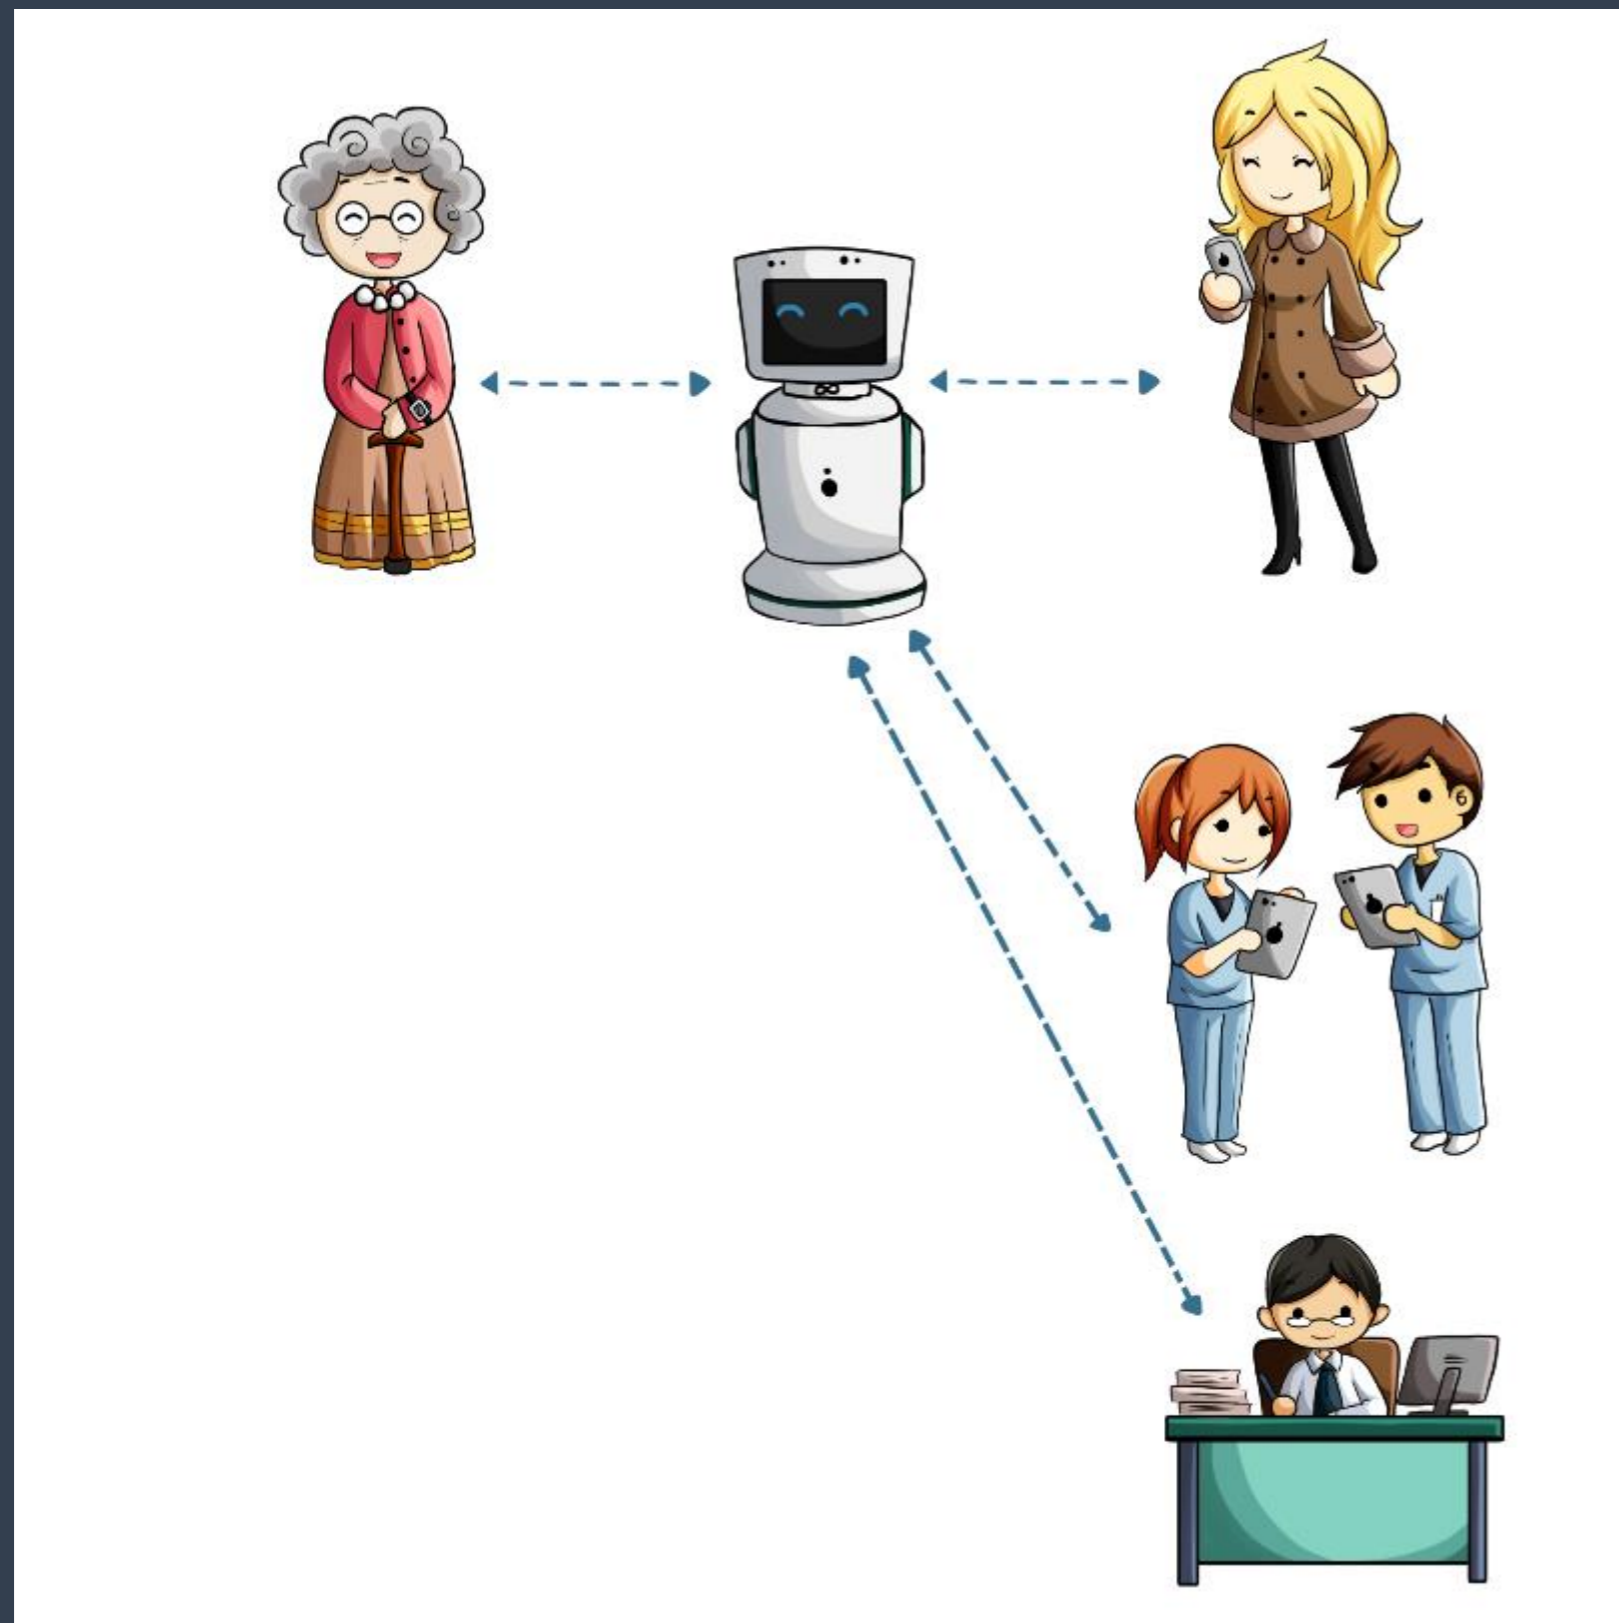

Mylo live in market trials 2021

So what exactly  
does Mylo do?

# What Does Mylo Actually Do?

Functional and yet adorable!

## Safety

- Fall Response
- Heart Rate Response
- Remote Monitoring
- Guard

## Independence

- Medication Prompts
- Hydration Prompts
- Daily Living Prompts
- Good Morning
- Appointments / visits

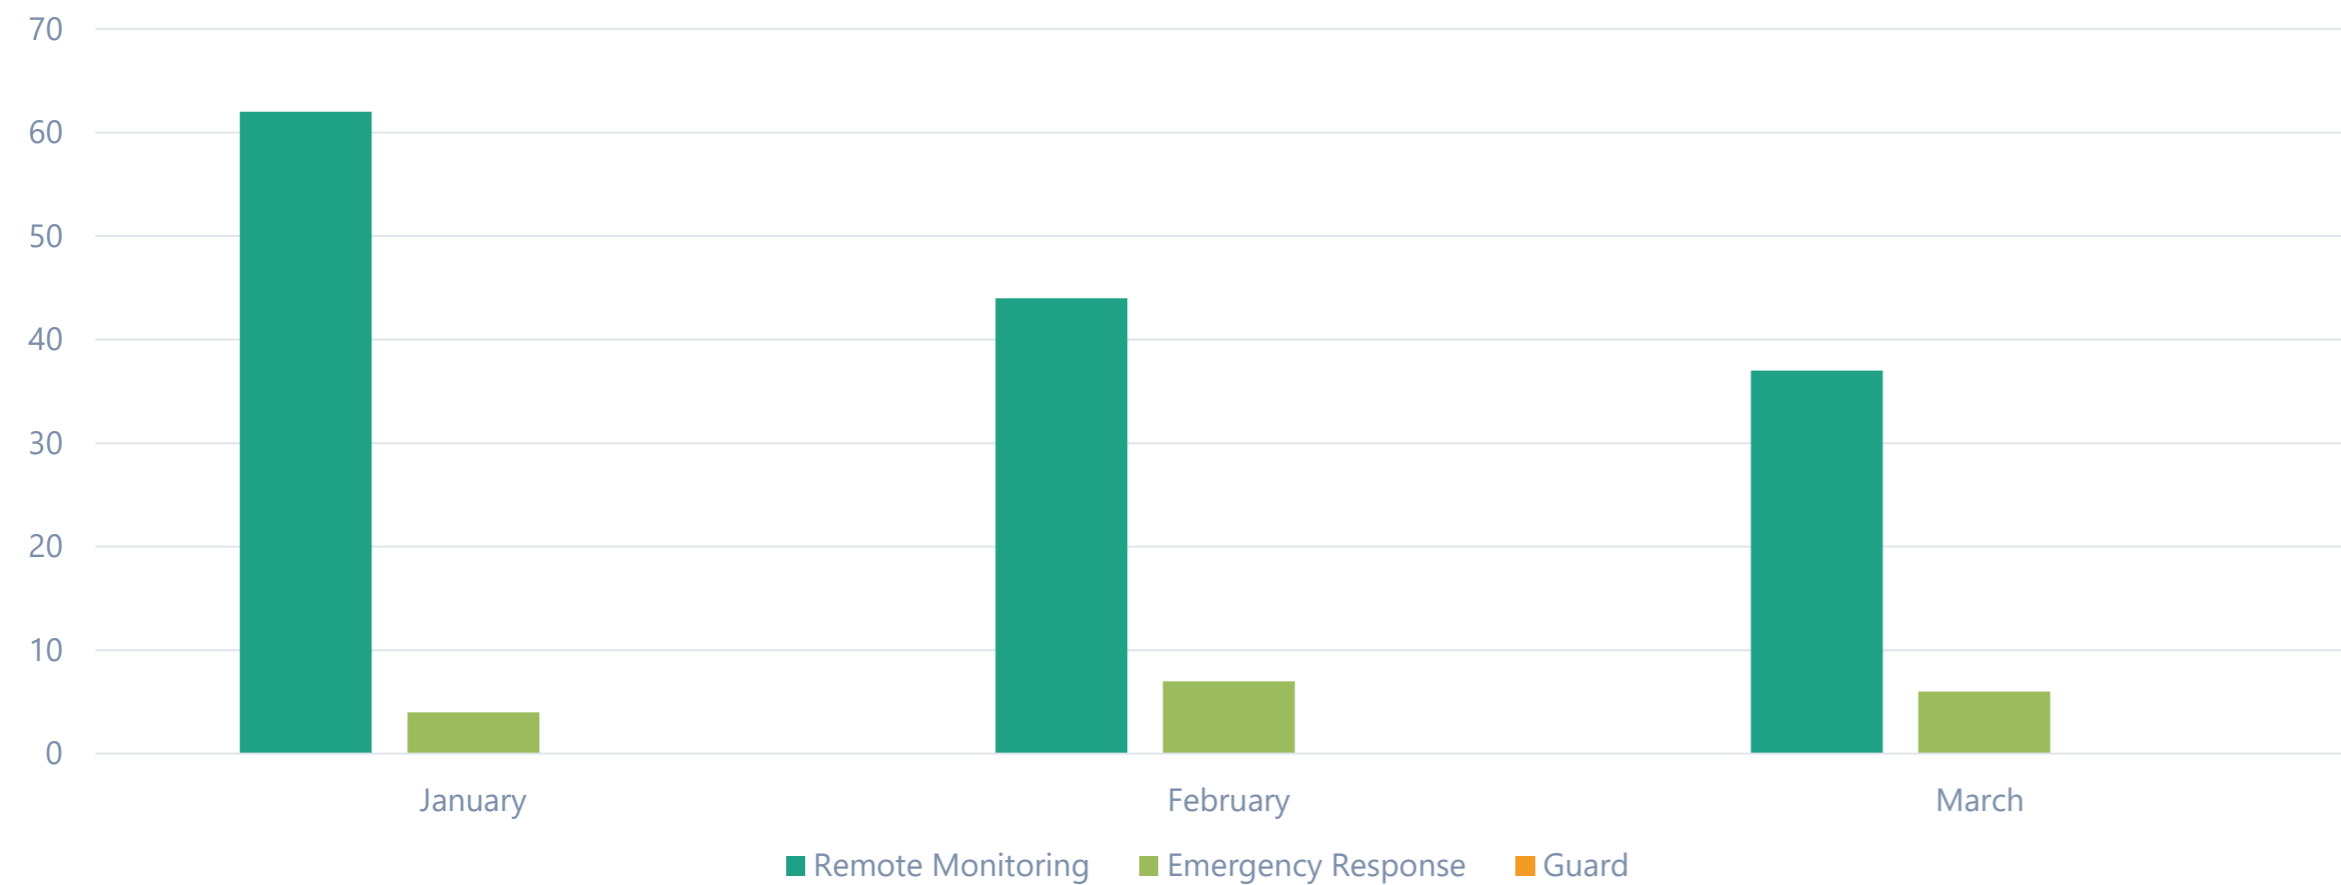

## Connection

- Video Calling
- Entertainment
- Social Pushes
- Companionship

# Safety

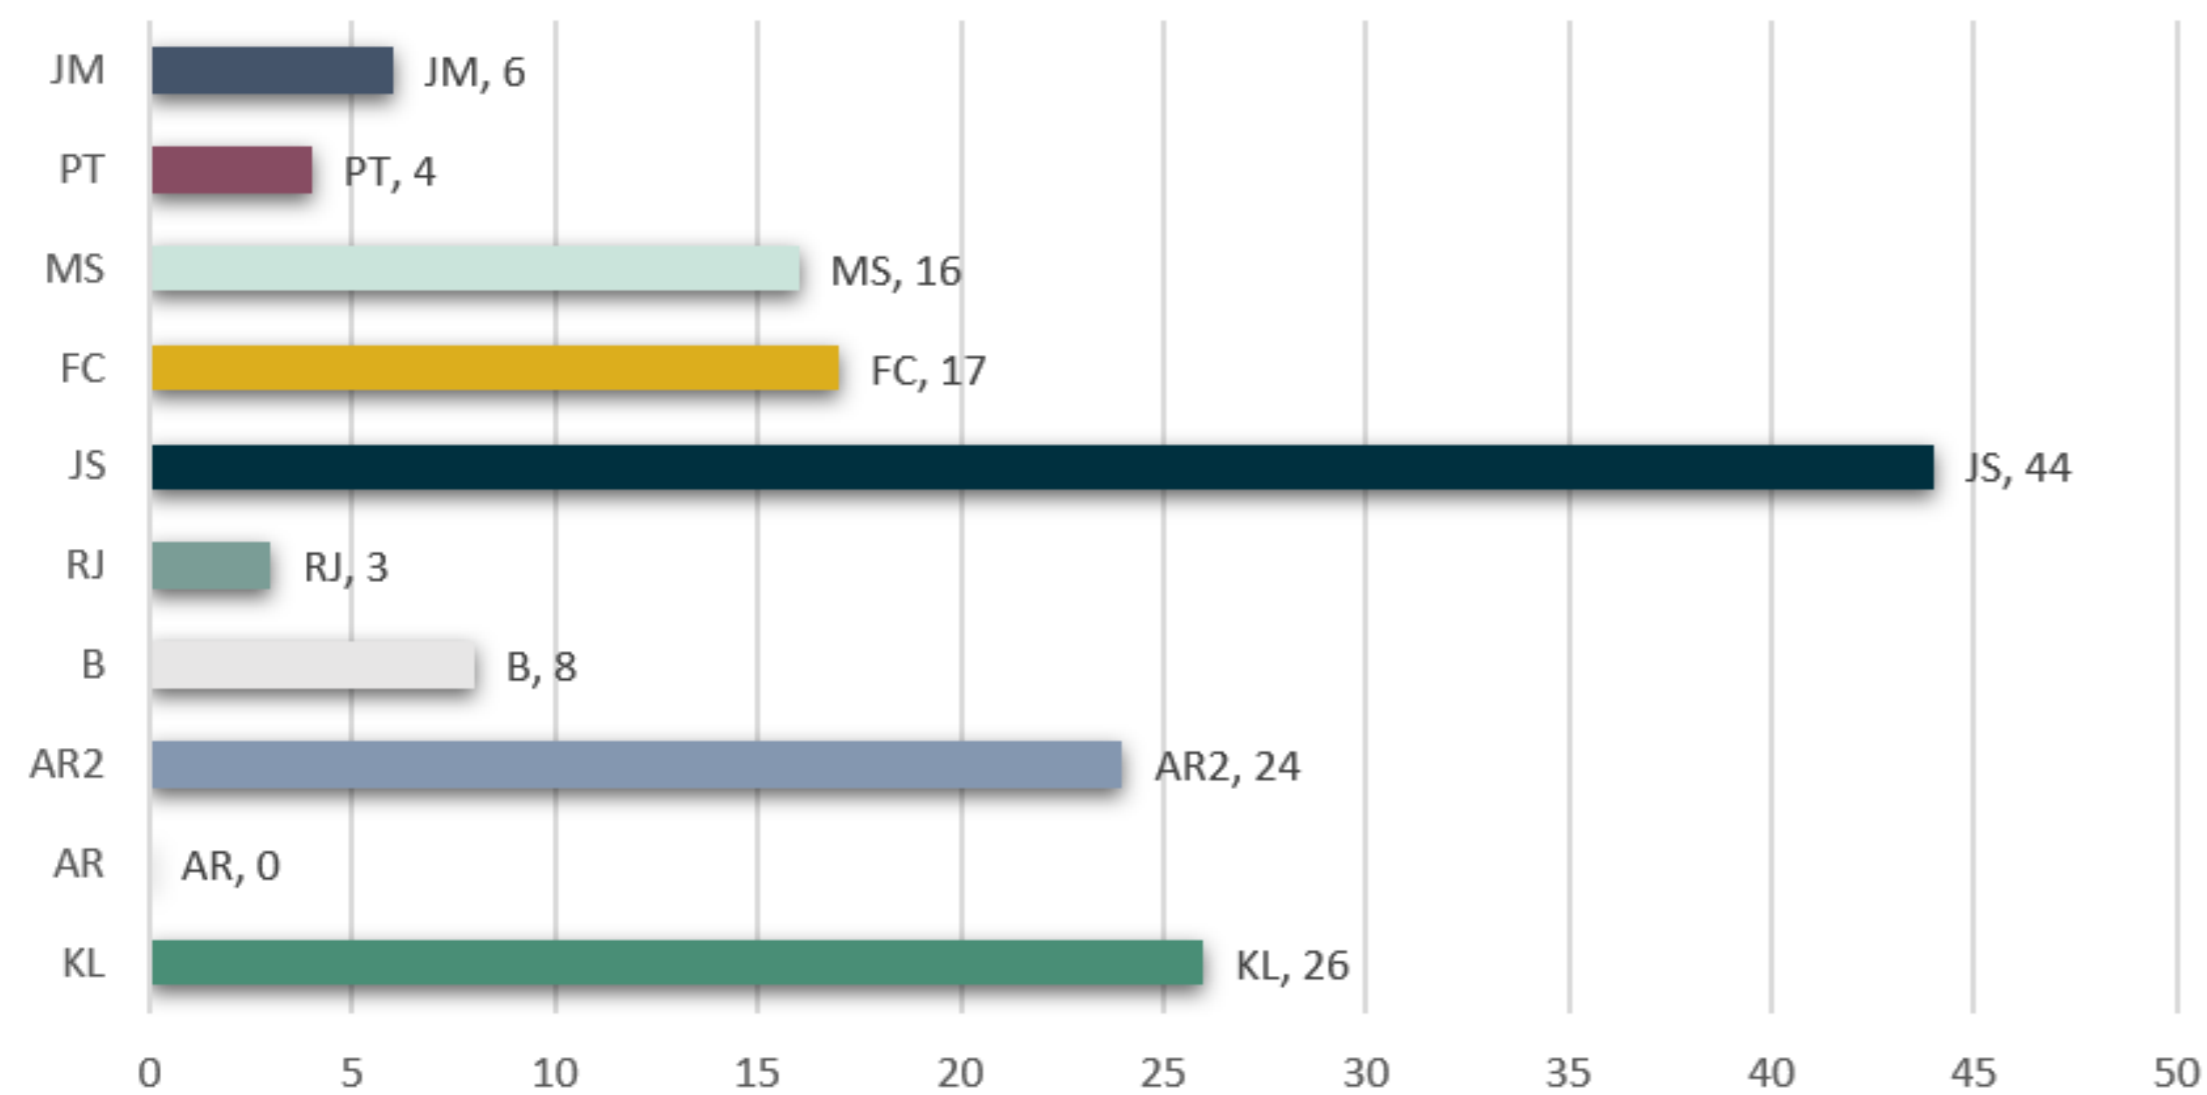

## Individual Homes Safety Function Usage 2021

Average over 20 users

## Mylos in Trial Nursing Home, 2020

### Remote Monitoring usage by Resident

## Mylo's Safety Functions

Helping to be safer at home without feeling intrusive or controlled

### Remote Monitoring

Controlling Mylo remotely to 'avatar' into the home

### Emergency Response

Fall / Heart Rate emergency response

### Guard (2021)

Anti-wander function

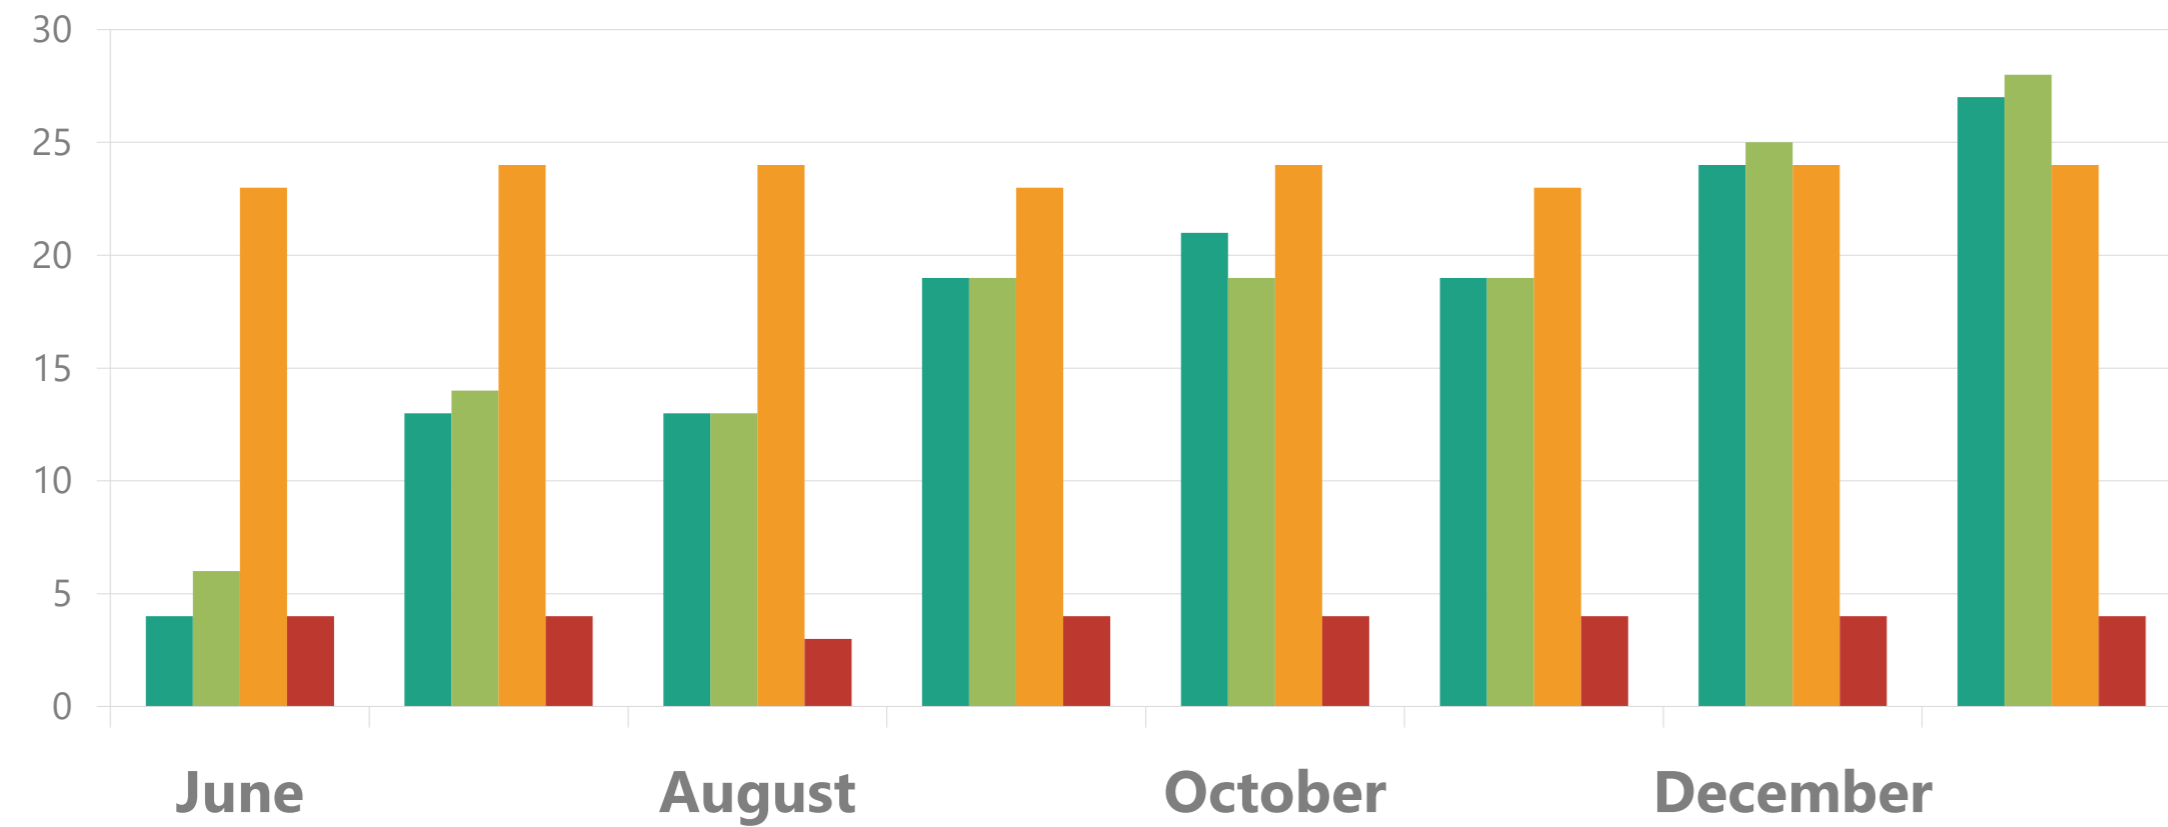

## Ethical Considerations

Mylo's ears turn purple when Remote Monitoring is activated

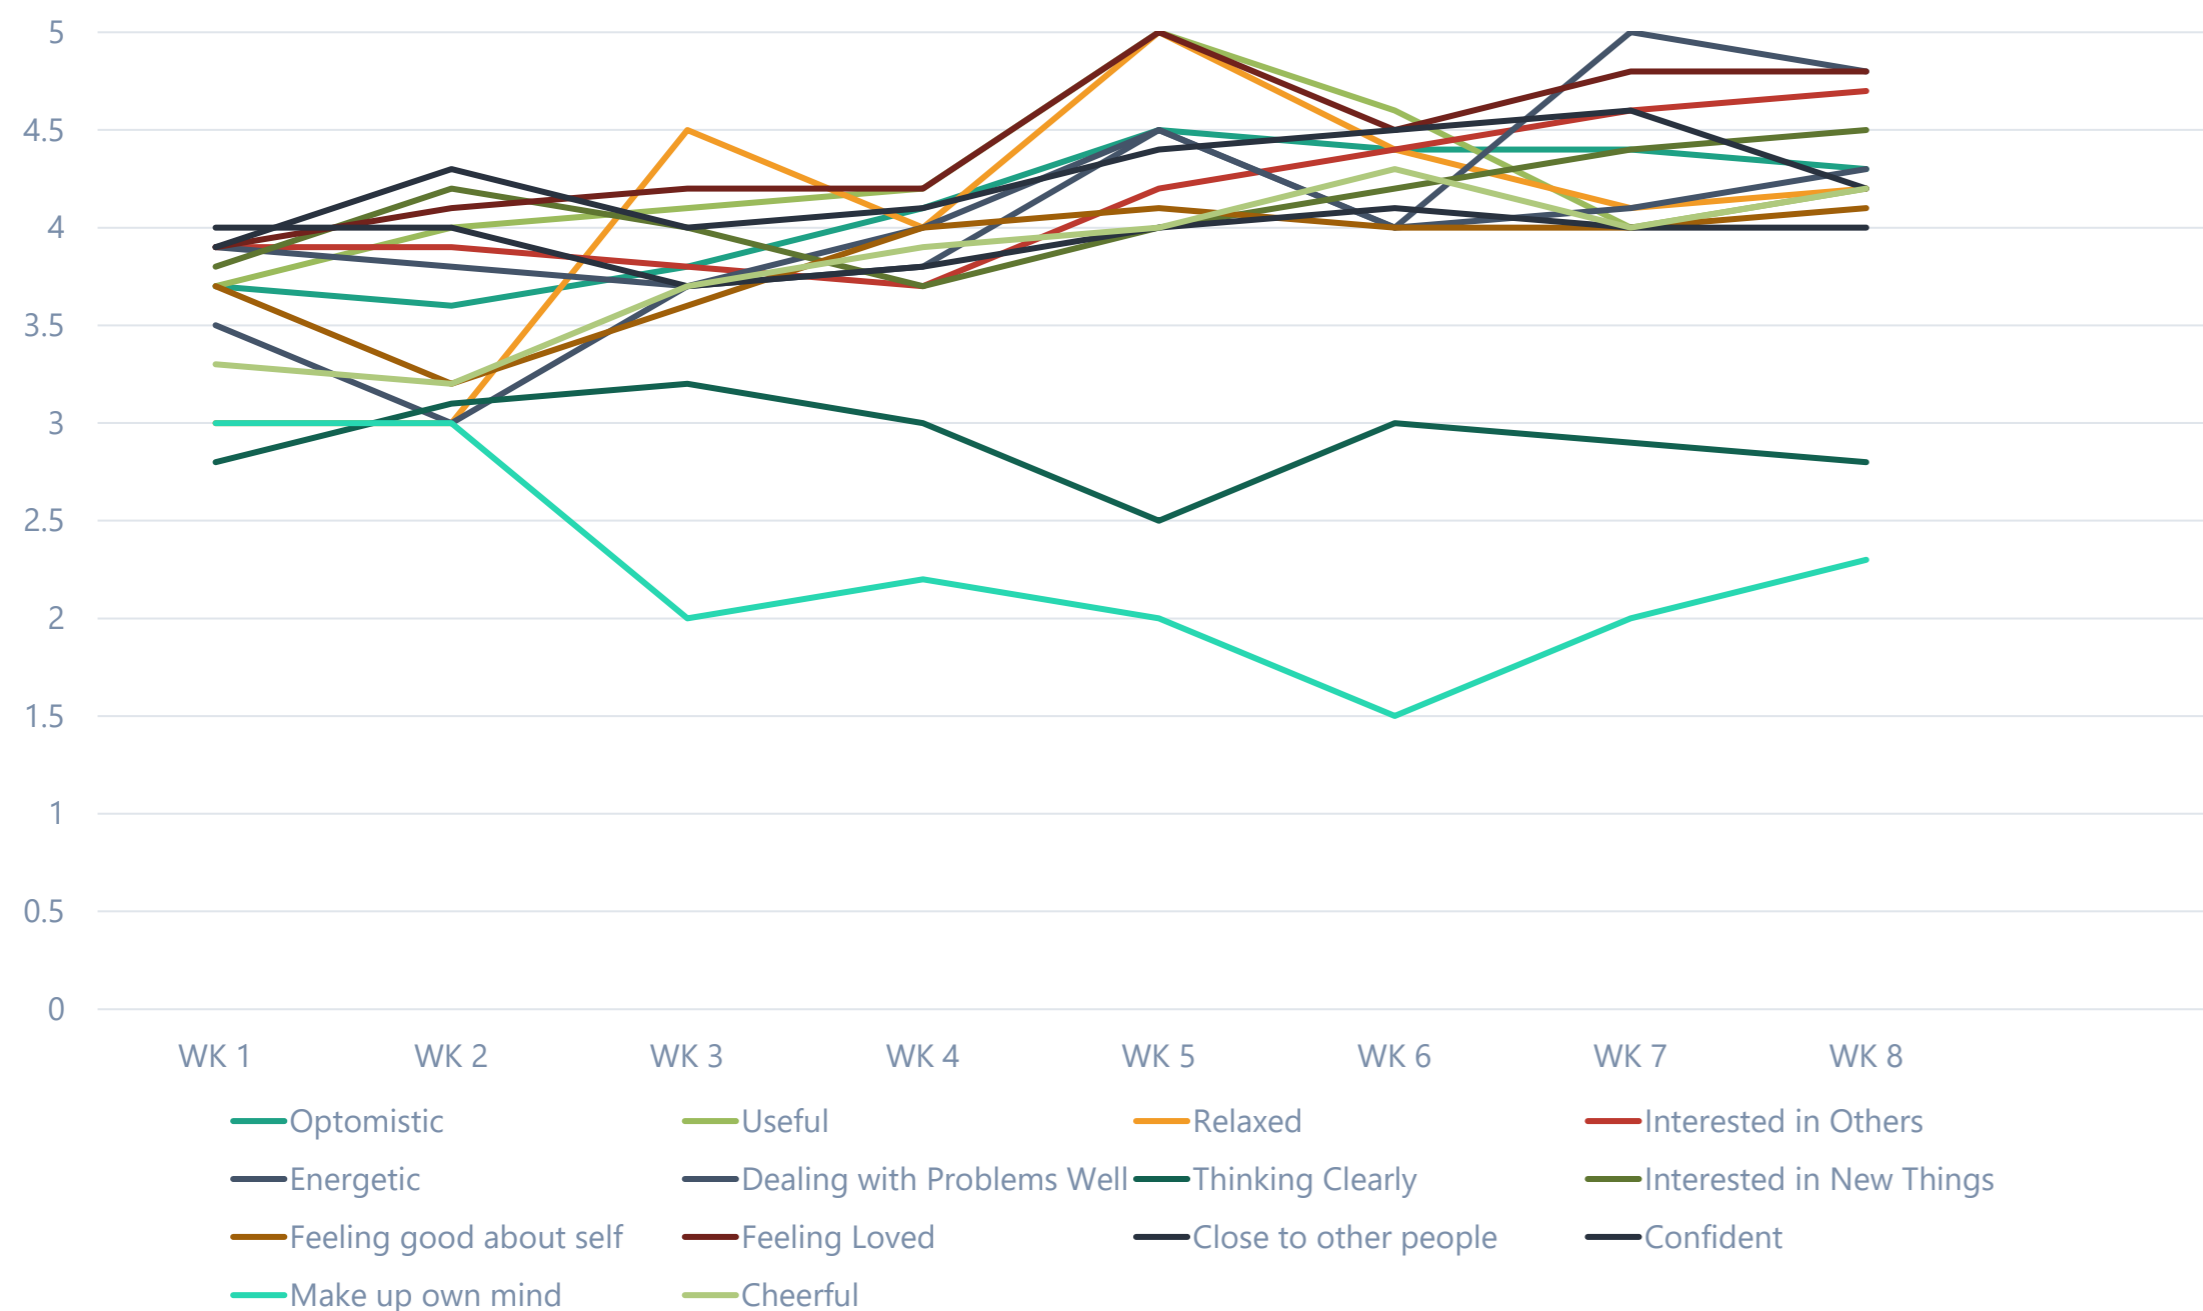

Mylo's Emergency Response provides choices to his user, with a default contact function in the event that a user is unresponsive

Mylo does not prevent his user from leaving. He gives a polite verbal prompt and then, if necessary, notifies a primary contact

Average number of function calls per month over sample of 20 users, 2020

Warwick-Edinburgh Mental Well-Being Scale

# Independence

Your smart little *sidekick*

## Getting Power Distance Just Right

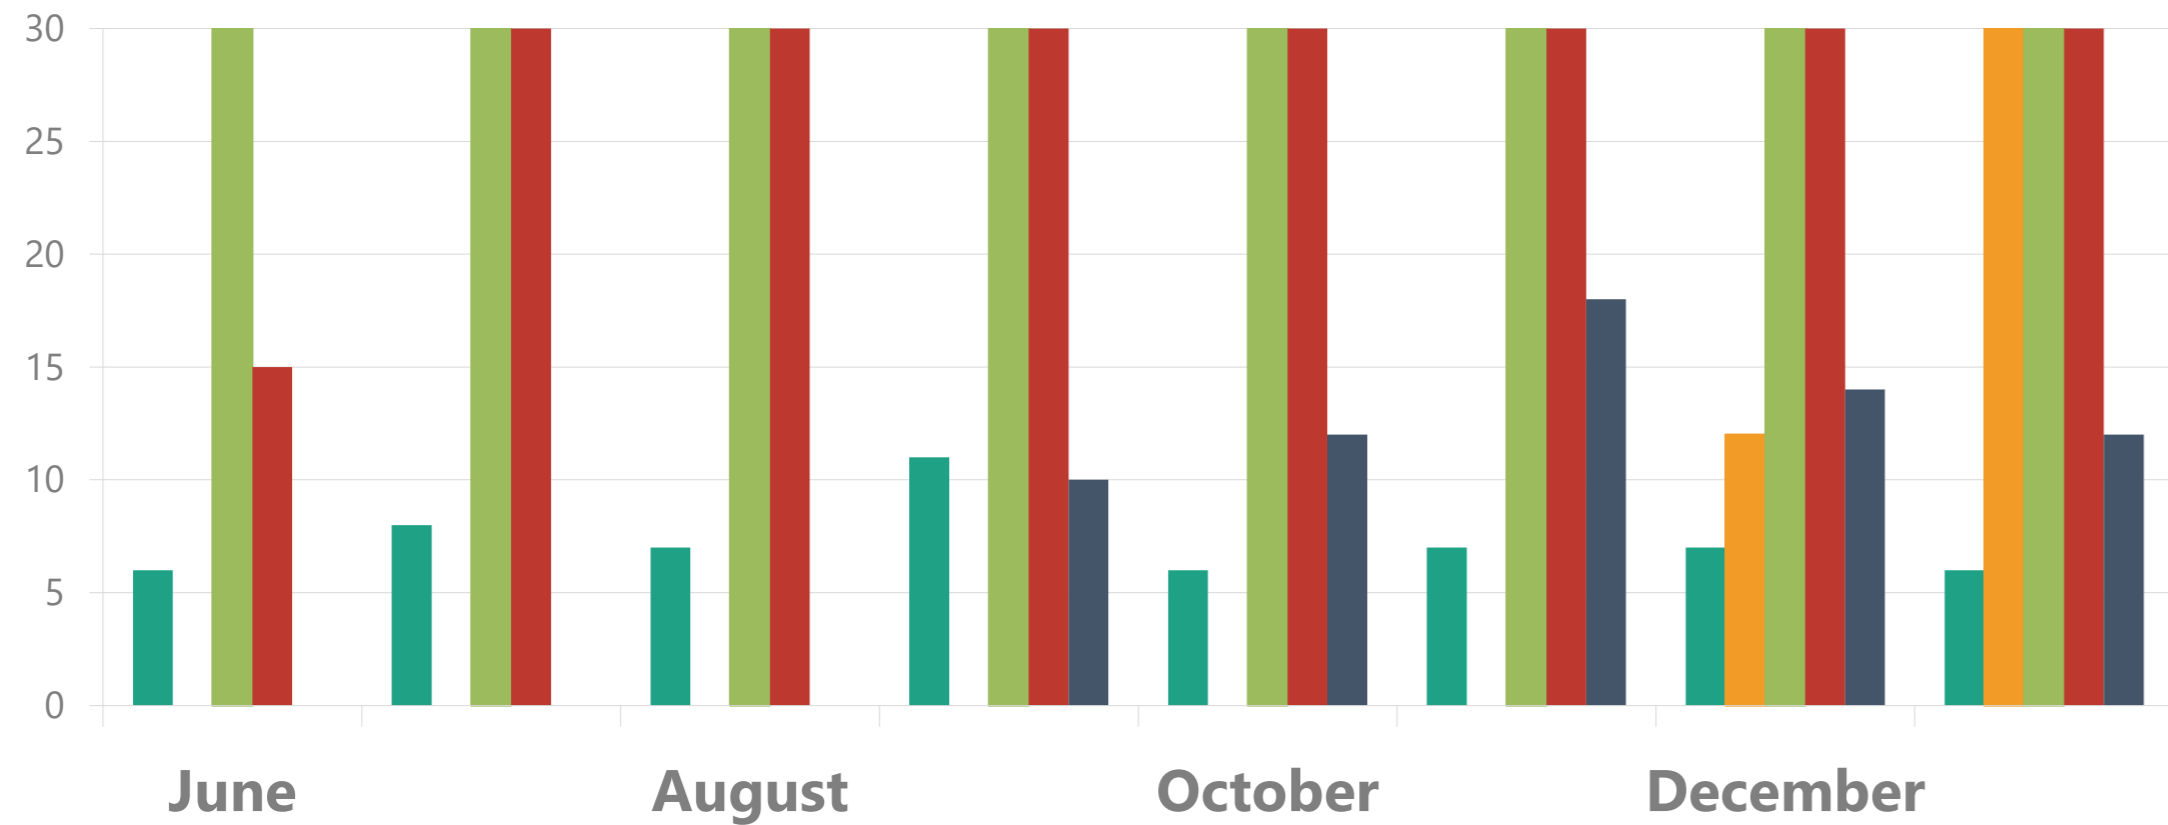

Mylo is his user's assistant, not his keeper

- 
**Medication**  
 Find his user, prompts with audio and visual with instructions
- 
**Hydration**  
 Gentle reminders to drink water or tea throughout the day
- 
**Good Morning**  
 Good morning (name), day, time, weather, schedule, etc
- 
**Appointments**  
 Scheduling, reminders, preparation prompts and gentle reminders of who people are

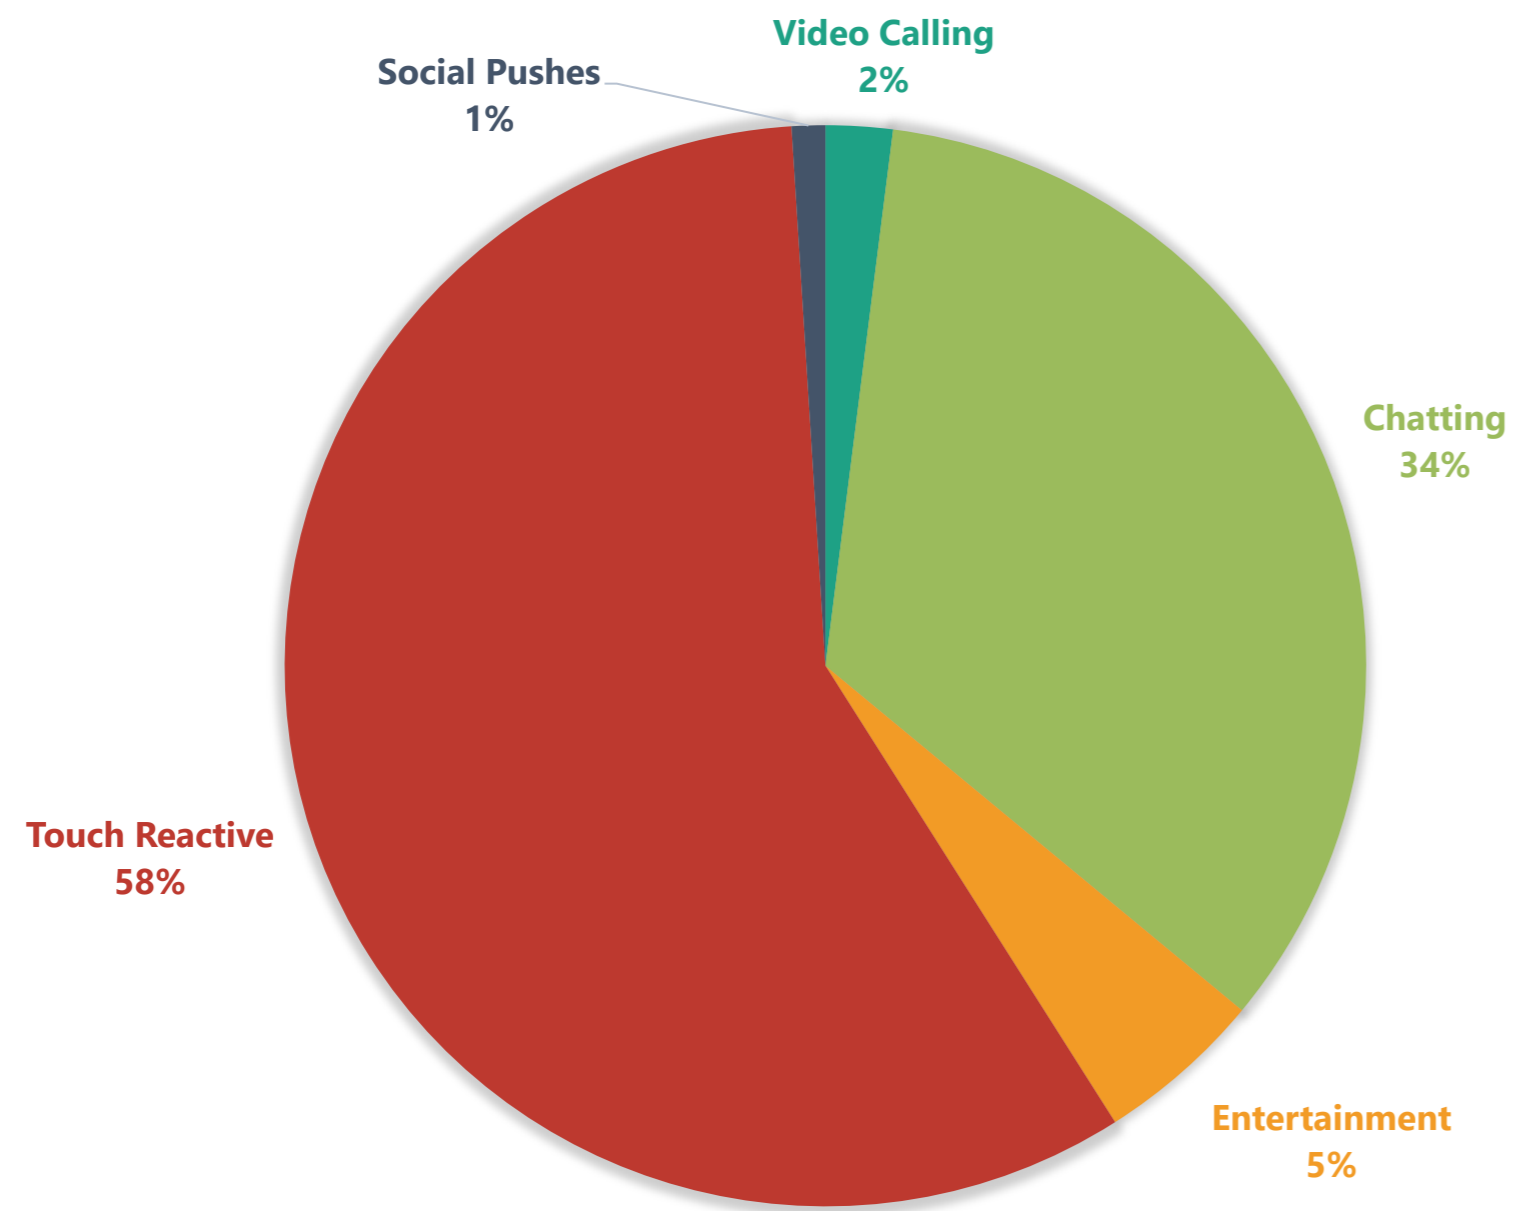

## Ethical Considerations

All prompts and reminders scheduled by Primary Contact using secure Mobile Phone App

Average number of function calls per month over sample of 20 users.

CONNECTION FUNCTION USAGE

# Connection

## Companionship

Working to reduce the effects of social isolation

### Video Calling

Remove the need for a hand-held phone

### Chatting

Limited chat function is growing constantly

### Entertainment

Direct access to youtube, games

### Touch Reactive

Mylo can be pet and interacted with

### Social Pushes

Schedule prompts to make calls, attend events

# Individual Families

The features they like and use most

---

## Family Carers

## Users

### Independence Reminders

Medication, hydration and appointments

### Good Morning Function

### Remote Monitoring

### Communication tools

Video calling, chatting

### Heart Rate Monitoring

### Independence Prompts

Medication, hydration and appointments

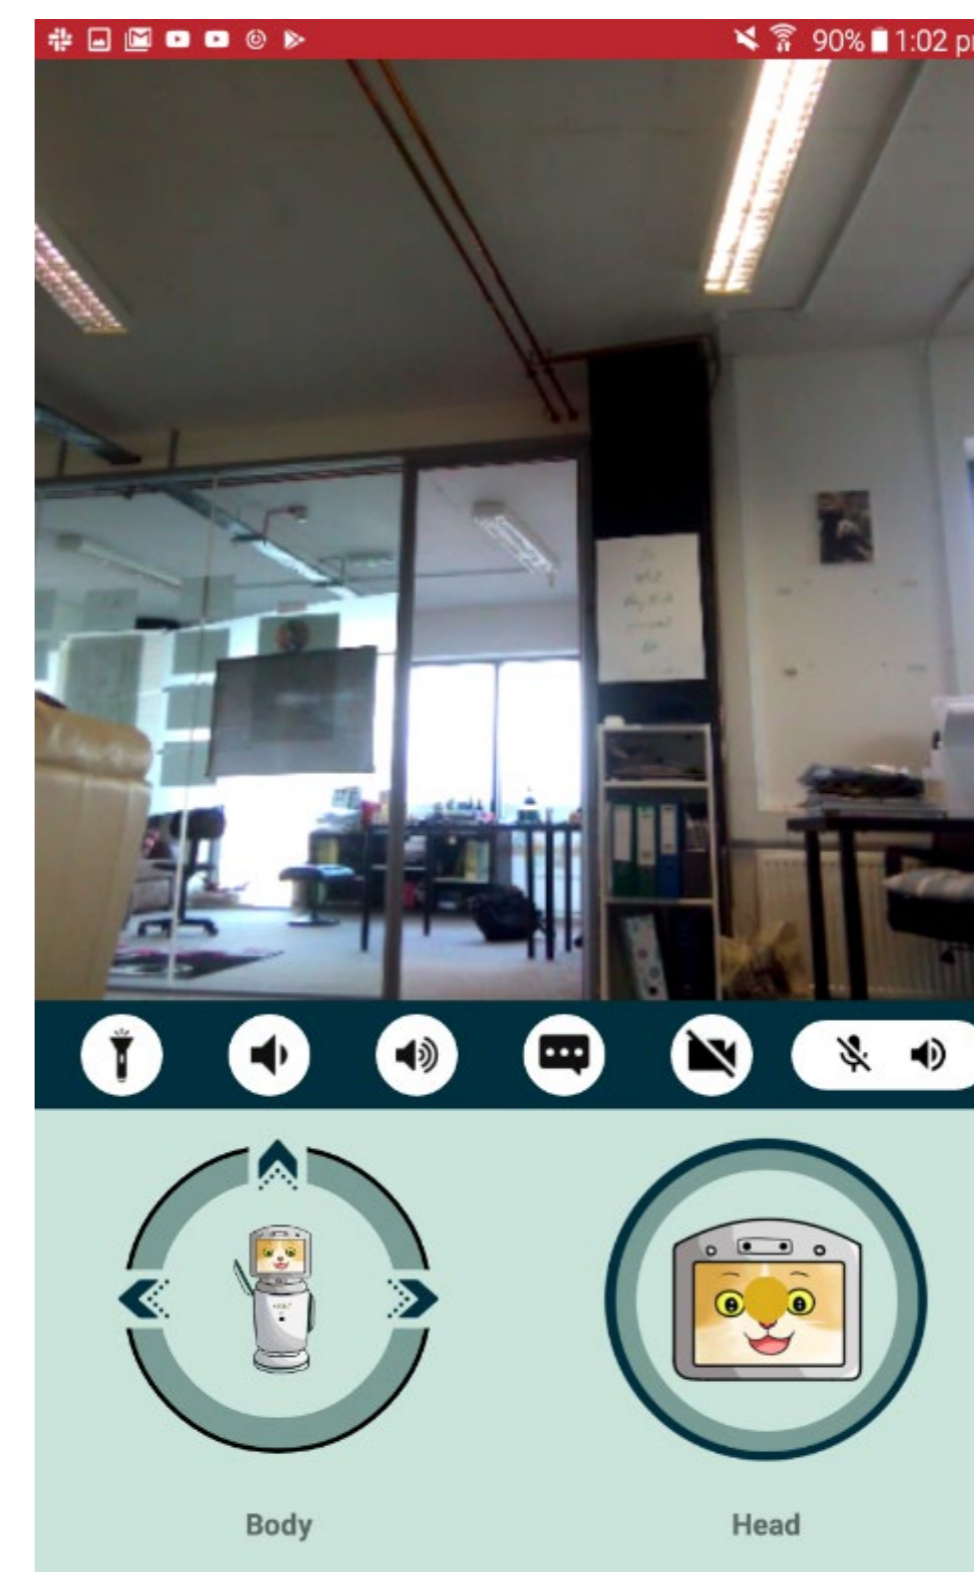

# How Does it Work?

Simple to use Android or iPhone App

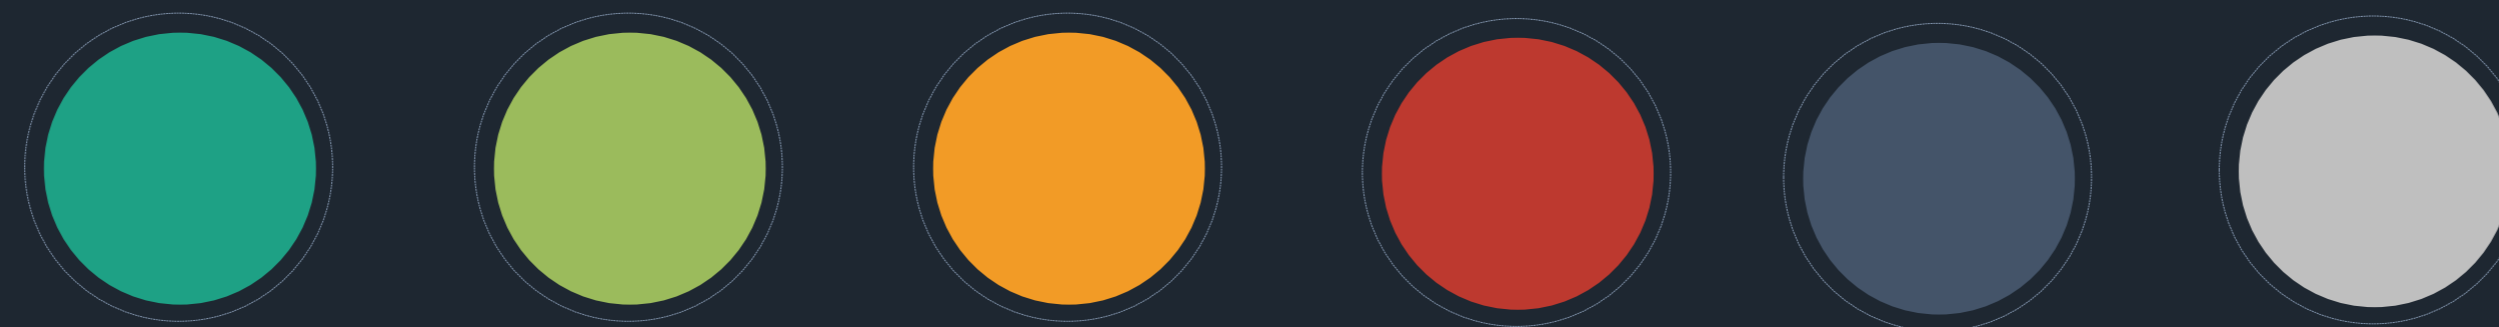

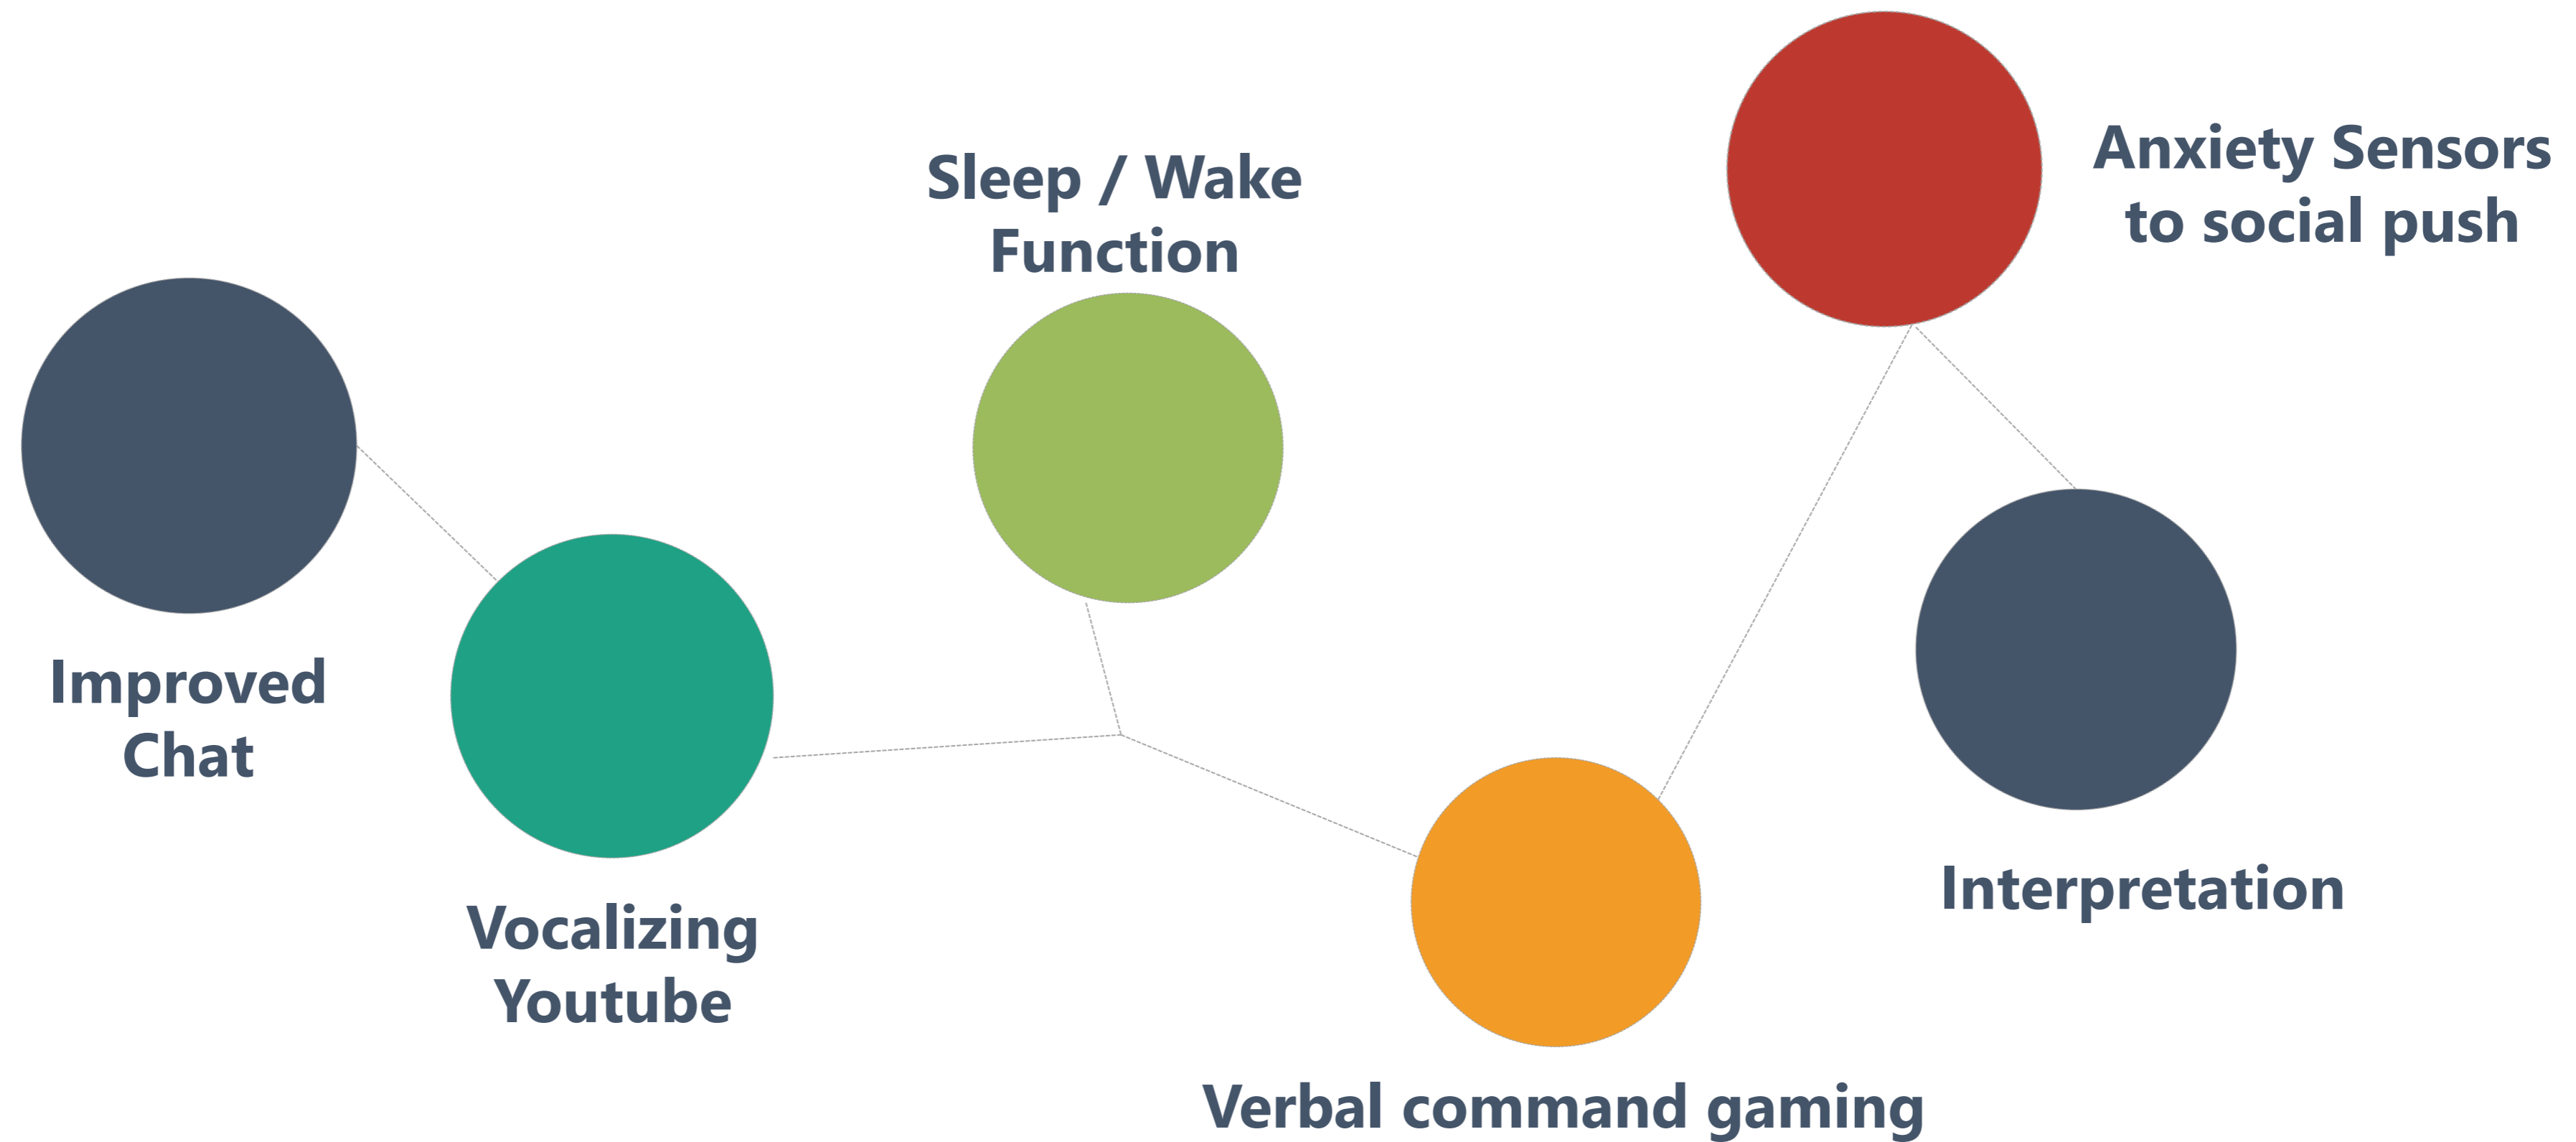

Primary Contact phone / tablet App

Fully manage Mylo from a phone app (for individual family usage) or a tablet app for multi-user monitoring (such as in a Nursing Home, Hospital or Home Care setting)

# What we are working on

Updates and new features **in the works**

We are constantly working to develop further functions, improve existing functions and to dream up new functions to research
