Impact
Gain an insight into your learning environment and measure the effectiveness of your online training.

In the UK, from April 16, PSRL is combined with a complete suite of Impact measurement tools written and developed by leading academics, including Professor Nick Steneck, Professor Emeritus of History at the University of Michigan.

The Impact toolset combines analytics and reporting tools covering the basics of course uptake, completion and performance, with surveys designed to provide critical information about learning or research climate, learner motivations, capabilities and perceptions of training quality.
