1. The aim of the conversion table is to ensure that all results are treated equally by all disciplines.
2. If for exceptional reasons a discipline deviates from the table, they must inform the International office in writing, stating the reasons for the deviation.
3. Where there is a range of equivalent results, top of the range should be used unless evidence is provided to suggest otherwise.
4. It may be necessary to revise this table annually as new exchanges and information and feedback is received.

This table is for guidance only and should not be considered definitive.
