Postgradute Diploma in Higher Education Teaching, Learning & Assessment
Indicative Timetable and Delivery Format – Academic Year 2022/23

The flexibility of this programme means you can complete the Diploma from 2 to 4 years to fit in with your work commitments. Modules are run each year in the semesters listed below. Applicants must indicate modules they intend to take in their first year of the programme in the application form and should make their selection based on their ability to commit to attendance times and workload for credit weightings indicated for each module.

Notes: You must complete Module TL514 in your first semester of the programme. You should only register for TL520 in the year you intend to complete the programme. You can only register either TL517 or TL517X as this is a repeated module. Modules with times indicated in yellow alternate required attendance delivery weeks so that there is no clash of attendance times if taking these modules in the same semester. Participants will get a schedule of dates for each module at commencement.

	Module	Co-ordinator	ECTS	Delivery day/time	Delivery format
