

Thursday 17th November 4pm – Maynooth University Psychology Department

Dr. Caoimhe Hannigan (Trinity College Dublin)

Designing a digital health intervention for older adults with multimorbidity

Caoimhe Hannigan is a Research Fellow and Project Manager for ProACT. ProACT is a European funded project using digital health solutions to improve home-based integrated care, and aims to support older adults (aged 65+) with multimorbidity (more than one chronic condition) to remain living independently in their community for as long as possible. Caoimhe received a BA (Hons) in Psychology from University College Dublin, an MSc in Applied Psychology from University of Ulster, and a PhD in Psychology from Trinity College Dublin in 2016. Caoimhe has significant experience in the design and implementation of research related to cognitive function, health and well-being in older populations. Her key research interests include modifiable risk factors for chronic health conditions and dementia, brain health and dementia prevention, successful ageing, and interventions to support health and well-being in older adults. She previously worked as Study Coordinator for the NEIL Memory Research Unit in Trinity College. She was also a collaborator on the FP-7 funded Hello Brain project, the BIOMARKAPD project at St James' Hospital and the COASTAL project at Trinity College.
