

Crime prediction: recent approaches

Maynooth University Department of Geography invites you to attend a seminar presented by:

Dr Andrew Evans School of Geography
University of Leeds

Date: February 15th

Time: 4.00pm to 5.30pm

Location: Rocque Lab, Rhetoric House

Geographical analysis has been one of the mainstays of crime analysis for over 100 years.

This talk will give some background to the field and then cover some of the advances over the last 10 years, concentrating on predictive policing using the spatial analysis of crime patterns, and agent-based modelling.

Dr Andrew Evans is a Senior Lecturer in GIS & Computational Geography, University of Leeds with a primary interest in developing 'Artificial Intelligence' solutions in geography as well as developing new technologies to aid democracy and people's understanding of space, such as 'fuzzy' mapping software.

Department of Geography Seminar Series

All are welcome
