

Aspects of the iProtectU safety compliance software are available to use through mobile phone APPS. The following APPS are available on Apple and Android phones through the usual methods i.e. “Play Store”:

- iProtectU Incident
- iProtectU Observation
- iProtectU Audit
- iProtectU Asset Manager
- iProtectU A2B

In the APP download store type “iProtectu” into the search bar and the following will show up:

Click onto the APP that you want and download and open the APP. A security login is required as per the screen below:

The form features a blue header bar at the top. Below it is the iProtectU logo, which consists of a stylized 'i' icon followed by the text 'iprotectU'. Underneath the logo is the word 'Incident' in a blue font. The registration fields are arranged vertically: a text box for 'Url', a text box for 'Email', and a text box for 'Password'. At the bottom of the form is a prominent blue button with the word 'REGISTER' in white capital letters.

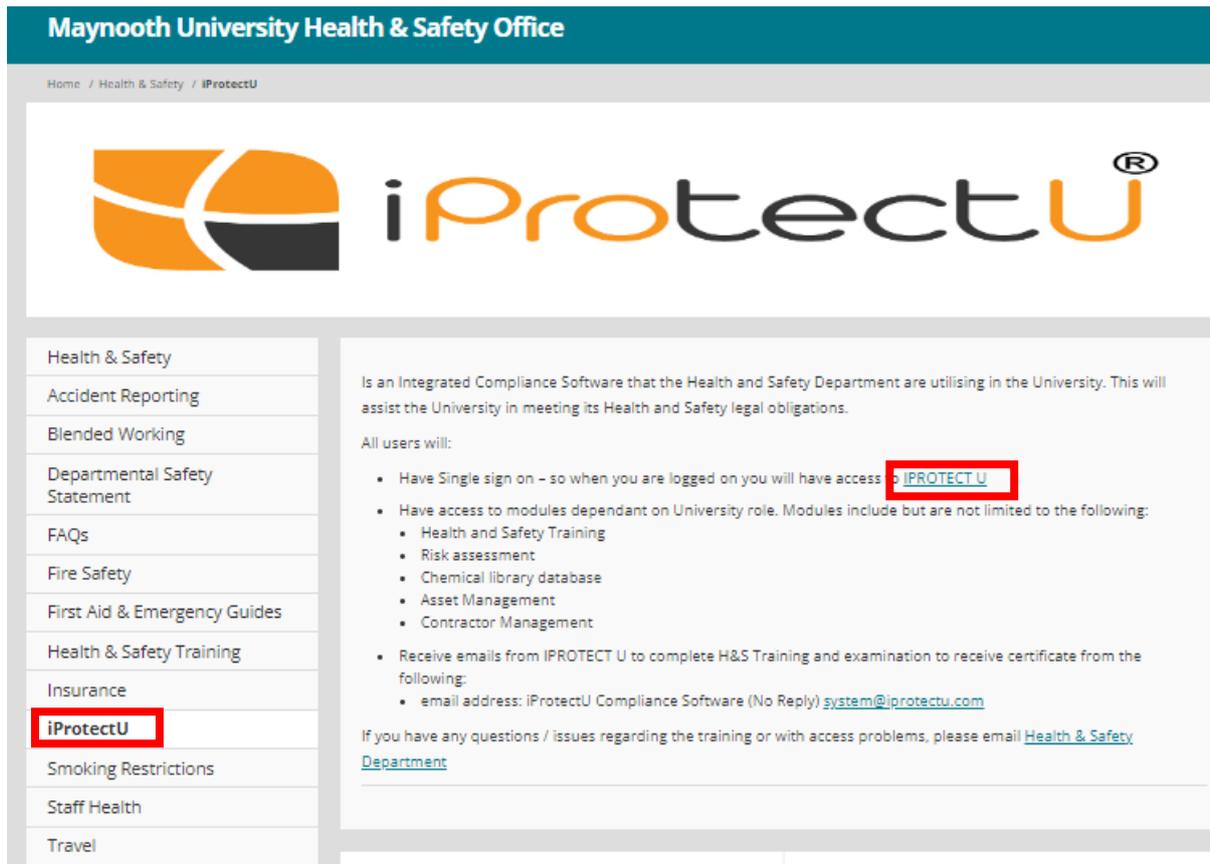

1. In "URL" type the following: maynooth.iprotectU.ie
2. In email type your email address
3. To obtain password follow the instructions below

[How to obtain APP Password](#)

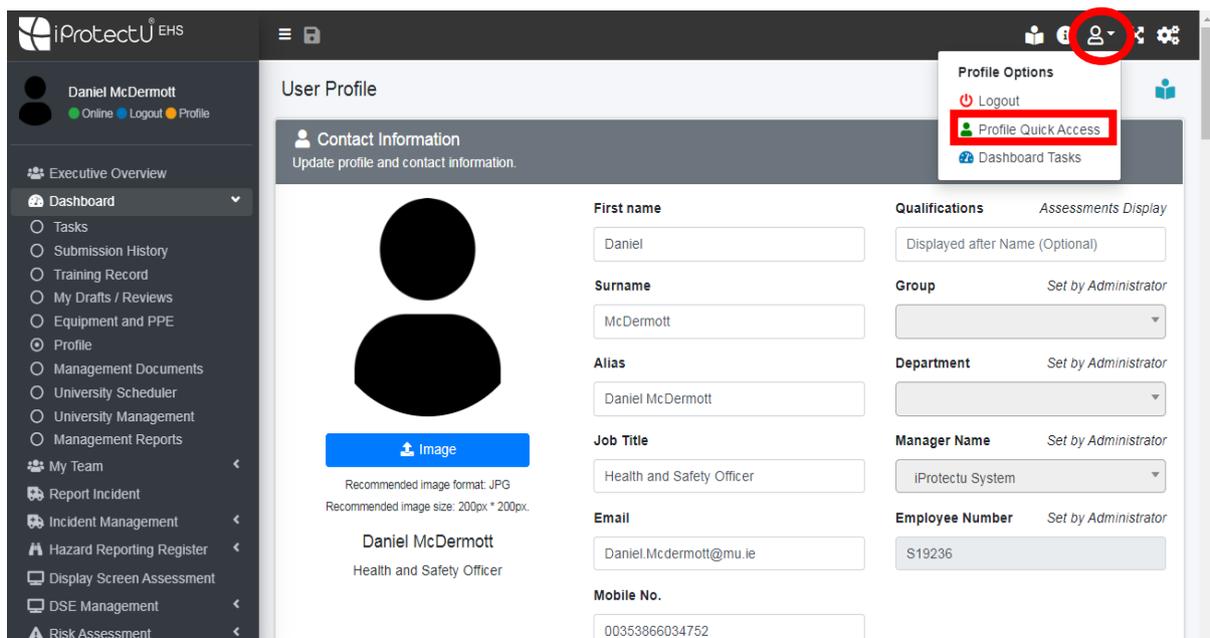

Due to fact iProtectU is accessed through SSO (Single Sign On), a password must be obtained from the website.

Open iProtectU website through the Health and Safety section of the University website.

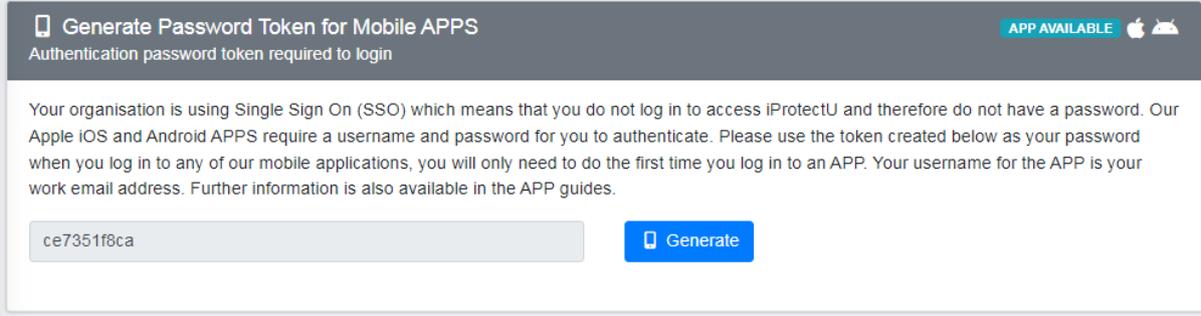

Click on iProtectU and open the software.

When in the iProtectU website, click on the  at the top of the screen and select  Profile Quick Access as per below:

Scroll down the webpage until you arrive at section named “Generate Password Token for Mobile APPS” as per below:

Click on “Generate” button and this will create a unique password token that is to be used under the password section of the app login.

An example of a completed login section is below:

Click on “Register” and this will allow you to access the APP.

APP Download Troubleshooting Tips:

1. Ensure there is no spacing between words
2. Ensure there is no space at the end of the word
3. The one password token should work for all APPS when downloading. If the password does not work repeat the steps above to generate a new password token.
4. If the APP does not download you may not have permission to access the APP. Contact the Health and Safety Office for assistance.
