

Quick Start Campus-Wide License for Faculty, Staff, and Students

Overview

This guide describes how to install and activate a Campus-Wide License. The Campus-Wide License provides access to all faculty, staff, and students on university-owned computers. Faculty, staff, and students are also able to install MathWorks software on their personally-owned computers.

Download Product Installer

1. Go to the MU MATLAB Portal at this link:
<https://uk.mathworks.com/academia/tah-portal/maynooth-university-31555618.html>
2. Under the Get MATLAB and Simulink section, select “**Sign in to get started**”.

3. For first time use, this brings you to the MU edugate page where you need to login using your MU credentials.
(Please note, the username for staff will be **jbloggs** and NOT *john.bloggs@mu.ie* and for students it will be your **student number**)
4. Sign into an existing MathWorks Account or Create a new one.
(FYI: This step will link the Campus license “40993731 MATLAB (Individual) Total Headcount Academic” to your Mathworks account.)
5. Click **download** for the current release (or an older release should you require it).
6. Choose a supported platform, for example “Windows”, and then download the **installer**.

Install MathWorks Products

1. Run the **installer**.
2. Sign in with the MathWorks Account you used earlier, and follow the instructions in the installer.
3. When prompted, select the **Academic – Total Headcount** license labelled **MATLAB (Individual)**.
4. In the Product Selection screen, select the products you want to download and then click **Begin Install**.
(It is recommended to only download what you need due to large file size and long download times, you can always add more toolboxes later)
5. When the installation is completed, click **Finish**. You may now begin using MATLAB. If you are new to MATLAB, learn the basics with **Getting Started with MATLAB**.

MATLAB Online

To use MATLAB Online via your web browser, just go to the following link (after logging in to your Mathworks Account)

<https://uk.mathworks.com/products/matlab-online.html>

Then click on “**Start using MATLAB Online**”
