

## Postgraduate Details

**Name:** Aoife Delaney

**Contact Details:** [Aoife.Delaney.2011@gmail.com](mailto:Aoife.Delaney.2011@gmail.com)

@AoifeD7

**(PhD) Research working title:** Urban Resilience: Flooding and the role of Coordinated Management and Emergency Response Systems.

**Supervisor(s):** Prof. Rob Kitchin and Prof. Mark Boyle.

**Supervisory Panel:** Dr. Leighton Evans.

### **Research interests (please include a paragraph summarizing your PhD project**

Her research endeavours to understand the inter-relationship between urban resilience and the smart city by exploring how software and other technologies drive public policy development and implementation regarding flooding in the city. This will be achieved by exploring the role, governance and design of Coordinated Management and Emergency Response Systems (CMaERS) in Dublin and Boston.

Aoife graduated from a Bachelors of Arts (Geography) Degree in 2013 with a First Class Honours and from a Masters of Arts Society and Space Degree in 2014, both awarded by Maynooth University. Her Undergraduate thesis studied the Digital Divide occurring between different second level schools in Kildare, Ireland and her MA thesis studied the evolution of Silicon Docks.

### **Publications:**

#### **Conference/Workshop Presentations**

Presented a paper on the “Evolution of Silicon Docks” at the Conference of Irish Geographers, May 2014.

### **Funding:**

ERC under the remit of the Programmable City.
