

## Time On Campus: Subject Guide for First Year Students

### *Expected on-campus teaching time for First Years*

#### **(First Semester Only)**

Version: 06 October 2020

This document gives our best estimate of the amount of on-campus teaching a first-year student can expect in each subject. This refers **ONLY** to on-campus time, and students will have the normal schedule of lectures and tutorials with the remainder delivered online.

This is intended as a guide and it may change over the coming weeks. There are three factors that might result in a change:

- **Public Health Guidelines:** The university plan is based on the policy guidelines in place at present. These determine that the maximum number in any venue is 50 students, and that students should be 2 metres apart where possible, and at least 1 metre apart. If these guidelines change, it may result in a change to the teaching plan.
- **The number of students in each module:** The number in each module is not normally determined until after registration, so these plans are based on estimated numbers. If the numbers in a module are significantly different from expectations, this may also have an impact on the on-campus time.
- **Teaching spaces:** We are working to optimise our use of space, and to free up lecture theatres and classrooms to allow more teaching to take place on campus. Some of this will only be possible after the start of the semester, when the number in each module is finalised. The figures here are based on the venues we know are available, and the amount of contact time may increase as the optimisation is completed.

We hope this will help you to understand our plans. To help read this document, please remember that a first-year student normally takes 60 credits, and in the first semester this is usually four modules of 7.5 credits each.

**Programme Advisory is available to assist and advise incoming first year students with programme related decisions they may be unsure about before and after their registration period. The Office can be contacted by emailing [programme.choices@mu.ie](mailto:programme.choices@mu.ie) with your query or using the WebChat facility.**
